MAINTENANCE AND CARE

OILED OAK

Our oak tables have a pigmented oil finish which forms a natural coating, repelling most common substances and fluids. Nevertheless, it's no foolproof guarantee against stains. We recommend removing any spilling immediately to prevent staining.

For daily care: Use a moist towel or sponge with a mild solution of water and natural, non-aggressive soap. Make sure your towel or sponge is not too wet!

For a quick facelift: When the wood starts to feel dry or is stained, we recommend using an oil or liquid wax cleaner for periodic maintenance of wooden floors. Do not use this product daily. Oil and liquid wax cleaner are no guarantee against stains, but they often do the trick and it surely doesn't hurt to try!

For stubborn stains & repairs: Through time and depending on wear, the original hardwax coating on the furniture may need to be renewed. Make sure the surface is clean and dry. Then sand the furniture using extra fine sand paper (minimum 320 grit) and work in the direction of the wood grain. Next, apply a new hardwax oil. These products can be purchased at a flooring specialist.

VARNISHED OAK

Our varnished tables are finished with a water-based lacquer for the protection of the wood and has an good chemical and mechanical resistance.

Regular cleaning with a mild solution of water and natural soap will do the trick!

Please do not sand varnished furniture, as this will damage the protective layer and will thus affect the water and dirt resistance of your furniture.

POWDER COATED STEEL

Steel is used in our indoor collection as well as our outdoor collection, mainly for the legs and frames of our furniture pieces.

For the outdoor pieces, the steel is always galvanized and powder coated to make sure it is protected from all-weather influences.

Clean your armour with a moist towel and some natural soap!
